WHAT I DO

STAFF AUGMENTATION ENGINEER

I join existing engineering teams to accelerate product delivery, reduce backlog pressure, and help ship features faster.

Flexible contract or long-term collaboration

Faster Delivery

Immediate contribution, no ramp-up lag. I ship code from day one.

Team Integration

Fits into your workflow, tools, and rhythm seamlessly.

Feature Development

End-to-end feature delivery at pace. From spec to production.

Bug Fixing

Debug, fix, and stabilize production systems quickly.

Remote Collaboration

Async & sync comms, available for any time zone.

Scalable Systems

Production-tested architecture decisions that scale.

EXPERIENCE

6+ YEARS BUILDING PRODUCTION SOFTWARE

'19–'21

Haper-Hit

Software Engineer

Data scraping platform. D3.js dashboards. UK remote.

'21–'22

Fiverr & Upwork

Freelance Developer

React, React Native, Node.js for international clients.

'22–'23

Afrilearn

Software Engineer

Scaled to 100K+ users. Next.js + React Native. 50% perf gain.

2023

TBC Dev

Software Engineer

Zooto cross-platform app. React Native + AWS S3/RDS.

'23–NOW

Wazobia Tech

Team Lead

Lead 4 engineers. Built vt.co & twistedfoods. 100K+ weekly users.

HOW I WORK

REMOTE-FIRST COLLABORATION

✓ Already working remotely with UK teams since 2019 · Currently: Team Lead @ Wazobia Technologies

Agile Workflow

Sprint cycles, standups, retros — I fit your existing process.

Async Communication

Clear written updates. You're never chasing me for a status.

Daily Progress Updates

End-of-day summaries so you always know what shipped.

Figma Collaboration

Design handoff fluent — I read Figma files like code.

Git-Based Development

PRs, code review, branch strategy — clean repository hygiene.

Long-Term Ready

Actively interested in growing alongside your team over time.

TOOLS: Slack | Jira | GitHub | Zoom | Figma | Trello | Linear | Notion

ENGAGEMENT MODEL

START SMALL — SCALE IF IT WORKS

01 TRIAL WEEK

1–2 Weeks

Pick one feature or task. I join your team, use your tools, work in your sprint — you judge the quality of my output firsthand.

$150–200/wk

No retainer. Stop anytime.

02 CONTRACT SUPPORT

1–3 Months

A defined scope — a feature set, a launch, a backlog sprint. I commit to your cycle and ship measurable deliverables.

$150–200/wk

Fixed scope. Clear deliverables.

03 LONG-TERM COLLABORATION

Ongoing — Open to This

I know your codebase, your team, your code standards. Reliable, affordable engineering capacity — without the headcount risk.

Negotiable

Still affordable. Still committed.

$150–200/wk starting. Budget-friendly engineering support for fast-moving teams.

WHY THIS WORKS

LOW RISK. HIGH VALUE.

Faster Shipping

No onboarding delay. I integrate fast and ship faster.

Lower Hiring Cost

Up to 94% cheaper than equivalent local headcount.

Experienced Engineer

6+ years, 3 UK companies, 100K+ users. Not a junior.

Remote Ready

Already doing this with UK teams. Zero setup friction.

Production-Tested

Real products, real metrics, real scale. Every time.

Easy Team Integration

I fit your process — not the other way around.

THE CURRENCY EDGE

$150/wk

94% less than US Dev

£116/wk

86% less than UK Dev

€138/wk

82% less than DE Dev

1 USD = ₦1,600+ · Isaac earns ₦240K/wk locally · Both sides win

Skip long hiring cycles and immediately add experienced engineering support to your team.

LET'S BUILD FASTER.

Available immediately for contract or long-term collaboration.

I've been working remotely with UK teams since 2019. This isn't a new experiment — it's how I work.
